# TravelScape: the solution

## Legacy Interfaces

Converting your legacy applications to web enabled applications can be very beneficial for your organization. It can provide global access to your data and systems, enhancing communication with your customers, partners and your employees – making it faster, simplifying the flow of your data and making the experience more seamless. By web enabling your legacy applications, you can discard the requirements involving multifaceted deployment.

## Architecture

Travelscape is part of Calculus technologies end-to-end XML product suite for travel distribution. It fully leverages the capabilities of the latest Java, XML and Web Services technologies. The Travelscape service oriented architecture is highly scalable and fault tolerant and can be deployed on Windows, Linux.
