

# FleetScope

## The most productive fleet and asset management system.

FleetScope software system is designed to improve productivity and simplify how you manage your fleet. No more spreadsheets, out-dated systems, or headaches when trying to gather information for upper management.

FleetScope is a high-end fleet management software system that offers a comprehensive feature set needed to manage complex fleet operations all while being:

- Easy to use
- Flexible and configurable
- Scalable to meet changing needs over time
- Integrable with other systems (fuel cards, gps, etc.)
- Supported by a best-in-industry technical support team

## Manage everything from fleet maintenance to operations:

- Maintenance management
- Parts inventory management
- Repair history information
- Equipment tracking
- Equipment component tracking
- Resource allocation
- Job site costing
- Customer management
  - Work orders
  - Tool management
  - E-mail notification system
  - Warranty tracking
  - Fuel tracking
  - Expense tracking
  - Purchase orders
  - Depreciation
- Uprfitting & disassembly
- License & certifications
- Inspection tracking
- Store documents related to any asset
- Accidents & claims tracking
- Incident tracking and reporting
- Much more

## Features

- Track detailed fleet and asset information with ease.
- Through standard and configurable options, FleetScope gives you the tools to track all data related to your vehicles and assets.
- Reference your equipment data in real-time
- Manage all costs associated with your assets such as costs-per-mile, depreciation, accidents, and more
- Track equipment components on assets
- Track contacts related to each asset and their roles
- Easily manage registrations and inspections per asset
- Analyze life cycle costs and determine when it's time for replacement
- [Mission Control Dashboard](#) for managing key performance indicators and take action on items

## Efficient preventive maintenance scheduling that includes automatic email notifications.

Extend the life of your equipment, reduce downtime, and get the most out of assets through better preventive maintenance.

- Know what preventive maintenance is due on any asset at any time
- Receive and send automatic email alerts when services, registrations, licenses, or other scheduled items are approaching or overdue
- Various reports give you cost, labor, parts used, and more related to your maintenance efforts
- [Learn more about automatic email notifications](#)

## Part inventory management and purchasing.

- Monitor essential information on parts, quantity on hand, quantity on order, and more
- Process purchasing, receiving, issuing, returning and transfer of parts
- Manage and recoup more warranties and core part returns
- Manage vendors and compare costs, history, and more through comprehensive reporting
- Find ways to reduce unused inventory
- [Barcode scanning capabilities](#) built in
- The [Advanced Parts Tracking](#) enhancement option extends the functionality even further to meet specific needs

## Powerful and easy-to-use work order system.

- Simplified processes to let you get in and input data while still gathering detailed information
- Specialized [shop interface](#) for giving technicians, supervisors, and parts personnel easy data entry and optimal workflow
- Create [estimates for services](#)
- The wealth of data works to provide reporting, quick access to repair histories, and decision-making power

## Manage costs related to accidents and look for areas to improve safety.

Safety is a huge concern for fleets and our software gives you the tools to track, analyze, and know what is going on.

- Accidents and claims management
- Monitor driver habits, traffic violations, and more
- Keep track of employee incidents
- Easily manage inspections on assets, resulting in issues being caught early and improving safety throughout the fleet
- Report on accidents, costs involved, and drivers at fault

## Flexible reporting and analysis.

Generate useful information regarding your fleet, costs, resource allocation, and more.

- 100+ standard fleet and operational reports
- Ability to create custom reports with the built-in report editor
- Ad-hoc style reports that make creating simple, custom reports easy for the average user
- Advanced filtering and query options for showing relevant data
- Export to .CSV and .PDF
- Graphs and charts

## Integrate with other software.

Collective Data offers a variety of direct integrations, exports, and reports that help you bring in data and send data out.

- Fuel Cards (WEX, Fuelmaster, Gasboy, and many more)
- GPS and Diagnostics Data (Networkfleet, Zonar Systems, and more)
- Accounting systems
- NAPA Parts integration
- Others upon request

## Expand the base system with enhancement options.

Not all fleets have the same goals and tracking needs. In order to help them succeed, Collective Data offers a variety of enhancement options that expand upon the comprehensive FleetScope solution.

## Construction Fleet Management Industry

Increase efficiency and boost productivity.

Completing projects on time and within estimates can be difficult to accomplish without an efficient deployment of equipment, crew, and other resources to the job site. With Collective Data software you'll be more productive, improve equipment maintenance, reduce downtime, and have better data to make more informed decisions.

Our comprehensive fleet management system is intuitive and easy to use, uniquely flexible and configurable, scalable to meet changing needs over time, and integrates with other systems such as fuel and gps.

- Manage mobile equipment and crew without the whiteboard or spreadsheets
- Save money through better preventive maintenance, better parts management, more warranty claims, and more
- Get the data you need to to make more informed decisions about your heavy equipment and crew

## Job Site Tracking

Manage and track the efforts of equipment, assets, tools, parts, employee labor, and sub-contractors as applied to job sites.

- Quick views and reports give you total costs by asset, materials, sub-contractors, etc.
- Keep documents related to the job site in one place for quick access and better organization

## Tool Management & Assignment

Our software gives you the power to improve how you manage and maintain your tools.

- Improve scheduling to assure proper maintenance on tools, resulting in improved useful life and safety.
- A variety of reports help you track costs, know when it's time to replace the tool, where they are assigned, and more.
